It is my pleasure to write a recommendation for Mr. Dereje Seifu. We first met when I was his mentor and examiner on a project.

During our time together, Dereje displayed great talents in software development, UI/UX design, and several other programming languages & tools. When we first met, I was immediately impressed with his technical skills. It's not just his technical skills that impressed me, his positive attitude and eagerness to stick tightly to his work are something that I personally admire.

I am absolutely confident that Dereje would be a great fit for IT-related businesses, especially in software development. Not only will he bring the kind of skills and experience you are looking for as a professional, but, he will also quickly become an asset and help you grow in any way he can.
