ABOUT ME

Experienced Full Stack Web developer with a proven ability to adapt in both self-starting and collaborative environments while staying focused on achieving high quality results under strict deadlines. This quality and results-based approach drove me to collaborate with Rensys Engineering and Trading Plc to create a digital marketing ecommerce application that doubled average revenue in a single month and Merah Technologies to develop a social media app that empowers young girls. Eager to obtain a challenging position at a prestigious company that will expand my learning and build upon my developer skill.

WORK EXPERIENCE

Full stack Web Developer

Rensys Engineering and Trading plc [10/04/2022 – 30/11/2022]

City: Addis Ababa

Country: Ethiopia

- I developed **responsive, user friendly** ecommerce web application for solar products.
- I Developed **cold room management system** for **perishable** fruits.
- I was able to easily connect perishable fruit producers with cold room service providers and wholesalers.
- Communicate with developers and stakeholders on a daily base.

Front end Developer

Merah technologies [20/05/2019 – 30/09/2022]

City: Bahir dar

- Build fully **responsive** and easily **usable** social media application called **Superwoman**.
- Build crowd fund collecting application.
- Divide tasks into smaller units and prioritize it.
- Present and accept feedbacks.
- Communicate with Back-end developers, UI/UX designers and project managers.

Internship

Amhara Development Association [01/04/2021 – 30/08/2021]

City: Bahir dar

Country: Ethiopia

- Part of development team for **Balanced Score Card** web application.
- Communicated on requirements of the system.
- Implement 50% of the front end of the system.
- **Refactor** code to **optimize** the system.

EDUCATION AND TRAINING

Bachelor's degree

Bahir Dar University (Bahir Dar Institute of Technology) [06/10/2017 – 22/08/2022]

Address: Bahir Dar (Ethiopia)**Field(s) of study:** Software Engineering **Final grade:** 3.72

SKILLS

Programing Languages and Frameworks Skills

JavaScript, Reactjs, vuejs, Nextjs, CSS, Bootstrap, tailwind, HTML, Nodejs, Express, MongoDB, MySQL, REST API, Version control with Git/GitHub

Soft Skills

Good Communication, Problem Solving, Attention to detail, Teamwork & cooperation, Time management and self-learner

Language Skills

Mother tongue(s): **Amharic**

Other language(s): **English**

PROJECTS

Cold room Management System for Perishable Fruits

[15/09/2022 – 20/11/2022]

It is a project to develop a web application for the purpose of connecting **perishable fruit producers** and **cold room service providers** that store fruits in cold rooms to keep its **freshness**. The system also connects **wholesaler** with farmers who store his fruit in cold room to create **market linkage**.

my roles were.

- Participating requirement gathering and analysis, Implementing the front end of the admin and Local admin module, Integrating Front end with back end and testing the system

Technologies I used.

HTML, CSS, React-bootstrap, Reactjs, REST API, Google map API, Git/GitHub

Web and mobile based digital sales ecommerce Application for solar products

[01/04/2022 – 30/06/2022]

It is an ecommerce application used to sell solar products for **Rensys Engineering and Trading PLC**. The system helps the user to find the **nearest** Rensys Engineering **agent shop** to their home to pick up their online ordered products.

My roles were.

- Participating on elaborating and specifying requirements, Implementing the User side or website of the ecommerce application, Communicating with the Designers, Back-end developers and stakeholders.

Technologies I used.

HTML, CSS, Bootstrap, Vuejs, REST API, Google map API, Git/GitHub

Superwoman Social Media Application

[10/02/2022 – 15/08/2022]

The objective of this project was to develop a **social media application** that **connects** young girl to **successful** women as their **mentors** and **role models** for the purpose of **empowering** and **motivating** young girls and to provide empowering blogs. The system enables young girls to search and send mentor request to available mentor in the system and can chat with their mentors after request is accepted.

My roles were.

- Discuss and communicate on the concepts, feasibility of the system, Implementing the whole user Interface, integrating front end with back end, Communicate with UI/UX designers and manual testing of the system.

Technologies I used.

HTML, CSS, Bootstrap, Vuejs, REST API, Git/GitHub
